

**PACIFIC POWER & LIGHT COMPANY**  
**GENERAL RULES AND REGULATIONS**  
**DESCRIPTION OF SERVICE**

---

**Description of Service**

Electric service furnished under this tariff will be alternating current, 60 hertz, single or three-phase, at one of the nominal standard voltages given as follows. This tariff contains specific charges and billing adjustments for standard primary voltage metering and delivery.

**Secondary Voltage:**

a. Overhead Service

Single-phase, 120 volts, 2-wire, grounded  
Single-phase, 120/240 volts, 3-wire, grounded

Three-phase, 208Y/120 volts, 4-wire grounded  
Three-phase, 240/120 volts, 4-wire grounded  
Three-phase, 480Y/277 volts, 4-wire, grounded

Under certain conditions, at the option of the Company, single- phase, 120/208 volts, 3-wire, grounded; single-phase, 240/480 volts, 3-wire, grounded; and 480 volts, 3-wire, ungrounded service will be provided.

b. Underground Service

Single-phase, 120 volts, 2-wire, grounded  
Single-phase, 120/240 volts, 3-wire, grounded

Three-phase, 208Y/120 volts, 4-wire, grounded  
Three-phase, 480Y/277 volts, 4-wire, grounded

Under certain conditions, at the option of Company, single- phase, 120/208 volts, 2-wire, grounded and three-phase, 240/120 volts, 4-wire, grounded service will be provided.

c. Secondary delivery limitations: Company, at its option, may limit the maximum or minimum load served at any of the above secondary voltages through a single point of delivery to a size commensurate with the capacities of transformers of that voltage designated as a Company Standard.

**Primary Voltage:**

a. Standard Primary Voltage is three-phase, 7,200/12,470 and 12,000/ 20,800 volts 4-wire grounded.

b. Other than standard primary voltages in use by Company include 2,400/4,160 volt wye, 7,200 volt delta, and 19,800/34,500 volt wye.

*(continued)*
