

## Incentives for other equipment

Equipment Type	Minimum Efficiency Requirements	Customer Incentive
<b>Network PC Power Management Software</b>	<ol style="list-style-type: none"><li>1. Installed software must automatically control the power settings of networked personal computers (PC) at the server level.</li><li>2. The software must manage power consumption for each individual PC.</li><li>3. The software must include the capability to report energy savings results.</li></ol>	\$7 per controlled PC (up to 100% of measure costs)
<b>Smart Plug Strip</b>	Incentive applies to any plug strip that eliminates idle or stand-by power consumption of connected plug-load appliance through the use of an occupancy sensor, electric load sensor or timer.	\$15/qualifying unit

### Notes for other equipment incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. All equipment listed in the table may be eligible for incentives in new construction or retrofit projects.
3. Energy efficiency measure costs for network PC power management software are subject to Pacific Power approval.

PC = Personal Computer

Let's turn the answers on.
