STATE-SPECIFIC ITEMS ..... 3  
SUMMARY OF RECOMMENDATIONS..... 6

**ATTACHED EXHIBITS**

Exhibit PAC/301—Oregon Allocated

Exhibit PAC/302—Oregon Regulatory Liability Amortization

1 **Q. Please state your name, business address, and present position with PacifiCorp**  
2 **d/b/a Pacific Power.**

3 A. My name is Steven R. McDougal, and my business address is 1407 W. North Temple,  
4 Suite 330, Salt Lake City, Utah 84116. My present position is Director of Revenue  
5 Requirements.

### 6 **QUALIFICATIONS**

7 **Q. Please describe your education and professional background.**

8 A. I received a Master of Accountancy from Brigham Young University with an  
9 emphasis in Management Advisory Services and a Bachelor of Science degree in  
10 Accounting from Brigham Young University. In addition to my formal education, I  
11 have also attended various educational, professional, and electric industry-related  
12 seminars. I have been employed with PacifiCorp and its predecessor, Utah Power and  
13 Light Company, since 1983. My experience includes various positions with  
14 regulation, finance, resource planning, and internal audit.

15 **Q. What are your current responsibilities with PacifiCorp?**

16 A. My primary responsibilities include overseeing the calculation and reporting of the  
17 company's regulated earnings and revenue requirement, assuring that the  
18 interjurisdictional cost allocation methodology is correctly applied, and explaining  
19 those calculations to regulators in the jurisdictions in which the company operates.

### 20 **PURPOSE OF TESTIMONY**

21 **Q. What is the purpose of your direct testimony?**

22 A. My testimony:

- 23
  - Calculates the impact on the annual depreciation expense allocated to Oregon

1 and provides support for the allocation of the new depreciation rates and  
2 effective date; and,

- 3 • Identifies and discusses state-specific factors considered during the  
4 preparation of the “Depreciation Study - Calculated Annual Depreciation  
5 Accruals Related to Electric Plants as of December 31, 2017” (Depreciation  
6 Study), performed on behalf of the company by Mr. John J. Spanos of Gannett  
7 Fleming Valuation and Rate Consultants, LLC. The Depreciation Study is  
8 provided as Exhibit PAC/202 to Mr. Spanos’s testimony.

9 **ALLOCATION OF THE DEPRECIATION STUDY**

10 **Q. What is the Oregon-allocated effect on annual depreciation expense if the**  
11 **depreciation rates recommended by Mr. Spanos are adopted?**

12 A. PacifiCorp is proposing to allocate the annual depreciation expense using the 2017  
13 Protocol interjurisdictional cost allocation methodology that was approved in docket  
14 UM 1050. The adoption of the depreciation rates proposed in the Depreciation Study  
15 results in an increase of approximately \$67.1 million on an Oregon-allocated basis.  
16 In addition, the proposed ending of excess reserve amortizations results in an increase  
17 of \$0.8 million on an Oregon-allocated basis. The calculation of the Oregon-  
18 allocated depreciation increase is provided as Exhibit PAC/301.

19 **Q. What does PacifiCorp propose as the effective date for implementing the new**  
20 **depreciation rates?**

21 A. The company proposes the new depreciation rates be made effective January 1, 2021,  
22 to align implementation of the new depreciation rates to occur after resolution of the  
23 ongoing interjurisdictional cost allocation negotiations and to align with an

1 anticipated general rate case filing.

2 **Q. Does the 2017 Protocol allocation methodology continue through implementation**  
3 **of the new depreciation rates?**

4 A. No. The 2017 Protocol is currently approved through December 31, 2019. It is not  
5 yet clear whether a new cost allocation methodology will replace the 2017 Protocol,  
6 whether the 2017 Protocol will be extended, or whether, as specified in the 2017  
7 Protocol, Oregon will revert to the Revised Protocol upon expiration of the 2017  
8 Protocol.

9 **Q. Why is PacifiCorp proposing an effective date of January 1, 2021, after the 2017**  
10 **Protocol allocation methodology has lapsed?**

11 A. The company is actively working with parties in PacifiCorp's service territories to  
12 develop and adopt a new allocation methodology commonly referred to as the Coal  
13 Life Evaluation and Realignment Plan (CLEAR). Although the timing of a formal  
14 approval is unknown, the company believes an implementation date of January 1,  
15 2021 would allow adequate time for PacifiCorp and all parties to resolve and achieve  
16 regulatory approval of CLEAR. Aligning the effective date of the depreciation rates  
17 proposed in the Depreciation Study with the anticipated approval of CLEAR will help  
18 maintain customer rate stability.

19 **STATE-SPECIFIC ITEMS**

20 **Q. Please summarize the state-specific factors you considered when preparing your**  
21 **testimony.**

22 A. The primary factors I considered relate to the expedited excess depreciation reserve  
23 amortizations and the company's proposal for treatment of certain depreciation

1 related regulatory liabilities.

2 **Q. In the stipulation to the 2013 depreciation study, PacifiCorp included expedited**  
3 **excess reserve amortizations—can you please summarize why those**  
4 **amortizations were established? <sup>1</sup>**

5 A. The excess reserves relate to the retirement of assets occurring outside of projected  
6 expectations and changes in lives and net salvage rates that have occurred in the  
7 current and prior depreciation studies. Based on that information there were excess  
8 reserves for the Gadsby Units 1-3, and Blundell steam production units. Historically,  
9 any excess reserves are returned over the remaining life of the assets, however, as part  
10 of the 2013 depreciation study stipulation, parties agreed to expedite the return of  
11 these excess reserves over a shorter period.

12 **Q. Over what period were the excess reserves to be returned to customers?**

13 A. The excess reserve amortizations were to occur over the five-year period between the  
14 effective date of the 2013 depreciation study and this filing.

15 **Q. What is PacifiCorp proposing with regard to excess reserve amortizations?**

16 A. Consistent with the stipulation to the 2013 depreciation study, the company is  
17 proposing to end the excess reserve amortizations for Gadsby and Blundell. The  
18 Oregon-allocated impact for the elimination of the steam excess reserve amortizations  
19 is a \$0.8 million increase to depreciation expense and is set forth in greater detail in  
20 Exhibit PAC/301.

---

<sup>1</sup> *In the Matter of PacifiCorp dba Pacific Power, Application for Authority to Implement Revised Depreciation Rates, Docket No. UM 1647, Order No. 13-347, Appendix A (Sep. 25, 2013).*

1 **Q. Please provide a summary on the regulatory liability that was established as part**  
2 **of the 2013 depreciation study.**

3 A. In the stipulation approved by the Commission for the 2013 depreciation study, the  
4 company agreed to implement the revised depreciation rates effective January 1,  
5 2014. The company requested, and the Commission has continually authorized,  
6 deferral of \$0.9 million annually to a regulatory liability associated with the reduction  
7 to depreciation expense starting January 1, 2014, until the next general rate case.<sup>2</sup>  
8 The company has not filed a general rate case since the deferral began in January  
9 2014.

10 **Q. What is the estimated balance of the regulatory liability as of January 1, 2021?**

11 A. The company estimates that the regulatory liability balances as of December 31,  
12 2020, will be \$7.9 million as shown in Exhibit PAC/302.

13 **Q. Is PacifiCorp proposing to begin amortization of this regulatory liability as part**  
14 **of the Depreciation Study?**

15 A. Yes. The company proposes to amortize the regulatory liability balance of  
16 \$7.9 million over a five-year period to fully amortize the regulatory liability between  
17 the effective date of this Depreciation Study and the company's next depreciation  
18 study filing.

19 **Q. Please provide a summary on the accumulated depreciation balance for the**  
20 **Carbon plant decommissioning cost.**

21 A. At the time the Carbon plant was retired, the company had approximately  
22 \$28.0 million in accumulated depreciation to fund decommissioning of the plant.

---

<sup>2</sup> See *In the Matter of PacifiCorp, dba Pacific Power, Application for Authorization/Reauthorization of Deferred Accounting Related to a Reduction in Depreciation Expense*, Docket No. UM 1682.

1 Due to the difference in depreciation rates used in Oregon, approximately  
2 \$8.8 million of the \$28.0 million was situs allocated to Oregon. This balance has  
3 remained in accumulated depreciation. An additional amount in accumulated  
4 depreciation for the under-spent decommission cost of approximately \$0.6 million,  
5 allocated to all states, is also on the company's balance sheet.

6 **Q. Is PacifiCorp proposing to amortize the Carbon plant decommissioning  
7 accumulated depreciation balance as part of this Depreciation Study?**

8 A. Yes. The company is proposing to amortize both Carbon plant decommissioning  
9 accumulated depreciation balances over a five-year period, the anticipated period  
10 between this study and the next. The amortization of approximately \$1.9 million  
11 annually would be used to help offset the proposed increase in the Depreciation  
12 Study.

### 13 SUMMARY OF RECOMMENDATIONS

14 **Q. Please summarize your recommendations to the Commission.**

15 A. I recommend that the Commission find that the depreciation rates sponsored by  
16 Mr. Spanos in the Depreciation Study based on projected December 31, 2020  
17 balances are fair and reasonable depreciation rates for the company. I further  
18 recommend that the Commission order the company to implement these depreciation  
19 rates in its accounts and records effective January 1, 2021.

20 **Q. Does this conclude your direct testimony?**

21 A. Yes.
