

State	Engagement	Date	Category	Feedback	Response (If Applicable)
WA	EAG - Equity Advisory Group	January 2024	Transportation Electrification	It was recommended to explore cross collaboration opportunities among local Drive Electric Week events; participating in car shows is also worthwhile. This would allow for the showing off of electric vehicles (EVs) for little to no cost.	Pacific Power and Forth staff attended last year's Drive Electric Day Event at the Downtown Yakima Farmers Market. Pacific Power will continue to look for opportunities across the counties it serves for future participation and outreach.
WA	EAG - Equity Advisory Group	January 2024	Transportation Electrification	It was shared that two barriers to electric vehicle adoption are a lack of large employers making charging available and large commercial development areas not creating focal parts for charging and parking.	Pacific Power noted the feedback within its meeting public notes and shared it back with the appropriate team.
WA	EAG - Equity Advisory Group	January 2024	Transportation Electrification	It was shared that there are barriers to providing electric vehicle charging at multifamily properties. There are properties with more vehicles than allowed and there is a lack of easements. This adds to project costs to getting chargers installed. It was mentioned that city entities should be engagement to improve the planning process so that chargers can be installed without adding years to the project's progress. Furthermore, the power for a DC fast charger is at such a high voltage but it's difficult to get that voltage within the current infrastructure.	Pacific Power acknowledged the perspective provided and documented it within the meeting public notes.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program draft criteria, members appreciated the word 'detailed', however, suggested an approach that reflected a story. This would help convey value at the human level. This implies that a storytelling approach is essential to getting communities and community members to participate.	Pacific Power acknowledged the perspective provided and shared it aims to weave in story telling when sharing information on the grant opportunity.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program, it was suggested earlier planning and getting relationships with developers, local governments/county commissions, etc. earlier on is a best practice to overcome the high cost that comes with competition and educational barriers to involvement.	Pacific Power acknowledged the perspective provided and shared it will be hard to know which types of projects or applicants may apply but hopes Pacific Power can provide information in an accessible manner so that all applicants can prepare appropriately.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding equity in Pacific Power's Washington Communities Grant Program draft criteria: Proposals should determine specific barriers and clearly identify the intended beneficiaries of the project and how the project will remove those barriers.	Pacific Power acknowledged the feedback provided and stated it would work to reflect it back in the final scoring rubric.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program draft criteria: Methods of measurement need flexibility and the grant should have at least two options in metrics to measure - for example, number of visits and number of people helped by the project.	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program outreach, it is important to create balance between security and ease of access (language, complexity, etc.) including providing value through tools and systems that are easily shared and understood.	Pacific Power acknowledged the feedback provided and will work on adapting its final outreach strategies to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program take into consideration projects with downstream benefits (e.g., EV bus that doesn't have fumes).	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding general scoring rubrics, opportunities to make impacts to communities and populations will be missed when emphasis on project selection is based on numbers/metrics alone - for example, if an EV is used for a foodbank, more people could be served (70% ->100% served) that are in need but isn't necessarily captured via the grant application.	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Communities Grant Program scoring rubric: Knowing who will be impacted in the different areas of the applications (i.e., barriers being removed) that demonstrate if it'll be of interest to a community or more of a singular interest. An application that shows if barriers are removed in the process would make for a stronger application.	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.

WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Communities Grant Program scoring rubric: Innovation could look like different things, technology Innovation or process innovation. Technology Innovation has more risk, whereas process innovation could look like connecting with named communities in a new or better way.	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Transportation Electrification	Regarding Pacific Power's Washington Communities Grant Program scoring rubric: Innovation may look differently in rural or vulnerable populations, and can maximize deployment strategies that have been practiced elsewhere - and partnering with Community Based Organizations (CBOs) is essential to deploying. For example, Zipcars are already known and used but deploying differently and in these communities could use existing 'innovations'.	Pacific Power acknowledged the feedback provided and will work on adapting its final scoring rubric to reflect additional notes provided.
WA	EAG - Equity Advisory Group	February 2024	Weatherization	<i>Pacific Power posed the following question: What have you seen as barriers to participation or program access for community members?</i> The Sustainable Living Center suggested Pacific Power brainstorm new methods to connect with previous customers not weatherized as program spots open.	Pacific Power acknowledged the feedback provided and will ensure its program outreach tactics connect with all types of customers.
WA	EAG - Equity Advisory Group	February 2024	Weatherization	<i>Pacific Power posed the following question: What have you seen as barriers to participation or program access for community members?</i> Income qualifications can be a barrier, a lot of people are close to the cut-off guideline but are still struggling.	Pacific Power acknowledged the feedback provided and shared that it looks at income guidelines provided by the state to help guide their own.
WA	EAG - Equity Advisory Group	February 2024	Weatherization	<i>Pacific Power posed the following question: What have you seen as barriers to participation or program access for community members?</i> Local organizations may be lacking the support needed to educate users on technical concepts and program guidelines.	Pacific Power acknowledged the feedback provided.
WA	EAG - Equity Advisory Group	February 2024	Weatherization	<i>Pacific Power posed the following question: What have you seen as barriers to participation or program access for community members?</i> Yakima County Development Association stated that the Yakima County Clean Air program staff have gone out to work with customers who work with wood burning stoves and asked if there has been any coordination with Pacific Power on that effort?	Pacific Power stated that it has not coordinated with the Yakima County Clean Air program staff but is open to having a conversation with the group to better understand coordinating opportunities.
WA	EAG - Equity Advisory Group	March 2024	Regulation	A Pacific Power Equity Advisory Group member asked: 1. How does Pacific Power feel in it's readiness for the 2045 Clean Energy Transformation Act target date? 2. What are the challenges to hitting the goal? 3. What is Pacific Power bringing to the vulnerable populations space? Are Equity Advisory Group members invited to these spaces?	The Pacific Power Integrated Resource Planning team provided a follow up to these questions at the following Equity Advisory Group meeting in April. Pacific Power communicated that all, including the Equity Advisory Group, are invited to all Vulnerable Populations Workshops convened by Pacific Power.
WA	EAG - Equity Advisory Group	March 2024	Regulation	Regarding Washington State's Clean Energy Transformation Act 2045 nonemitting goal, SonBridge questioned the cost curves and what they do overtime? For Pacific Power, it must consider innovative technology that could become available and be more efficient, however, individuals have a challenging time forecasting the future. This could work for or against Pacific Power if individuals choose to strategize a specific way after already investing financial resources and infrastructure.	PacificCorp reiterated that the IRP is updated every two years and accounts for technology updates.
WA	EAG - Equity Advisory Group	March 2024	Community Priorities	Regarding community priorities and building trust and psychological safety, the following was shared: - Pacific Power could market itself better, it would be beneficial to have more representatives at local community events - More personable approach - Work with ambassadors with lived experience	Pacific Power is working to improve engagement and outreach strategies and take these recommendations into consideration.

WA	EAG - Equity Advisory Group	April 2024	Engagement	The Asian Pacific Islander Coalition requested Yakima Community College STEM students be considered for the workforce development portion of the grant Pacific Power received from the Washington State Department of Commerce.	The grant received from the Washington State Department of Commerce to conduct a feasibility study at the Yakima State Fair Park is now under new management. The team is planning to work with local organizations, including some schools, to fulfill workforce development requirements. Pacific Power will explore the Yakima Community College as a prospective school to involve.
WA	EAG - Equity Advisory Group	April 2024	Distribution System Planning	Equity Advisory Group members suggested Pacific Power consider the effects of nature, such as weather, ice, or vegetation in resiliency Distribution System Planning.	Pacific Power answered that the primary focus is load growth, but the company has considered resiliency specifically as it pertains to battery longevity. The plan is to continue working with the EAG to utilize feedback and incorporate resiliency even more.
WA	Clean Energy Implementation Plan (CEIP)	April 2024	Distribution System Planning	Jaclynn Simmons asked if <i>"PacifiCorp is considering Automatic Metering Infrastructure (AMI) for Washington? Do you need AMI to be able to deploy some of those nontraditional solutions mentioned?"</i>	The Distribution System Planning team has heard talks about considering AMI for Washington but cannot confirm anything is moving on this item at the moment.
WA	Clean Energy Implementation Plan (CEIP)	June 2024	Vulnerable Populations	Pacific Power posed the following discussion questions: 1) Do you agree or disagree with Pacific Power's assessment of the pros and cons of each approach? 2) Which approach do you perceive as more appropriate for identifying vulnerable populations? 3) In a geographic approach, what factors are important for right-sizing granularity of analysis? 4) What are important considerations for ensuring drivers of different outcomes are clearly identified? Members offered the following feedback 1) Go back and view the approach (geographic versus single-factor tracking) later as the definition of vulnerable populations progresses. 2) Suggests a deep dive to compare different programs and definitions of vulnerable populations as targeted by programs. Is there one utility that is servicing customers in a specific way? 3) How does Pacific Power plan to address single factor analysis and align it with geographic realities of the service area? As cons are identified, how does the company plan to cross between two analyses to get the best results? 4) Recommended to consider a cluster analysis as an alternative approach.	Pacific Power acknowledged the feedback provided and will continue to refer back to input provided as it adapts its vulnerable populations methodology.
WA	Clean Energy Implementation Plan (CEIP)	June 2024	Integrated Resource Plan (IRP)	Washington Utilities and Transportation Commission (WUTC) staff encourages Pacific Power to review the UTC's policy statement on the Inflation Reduction Act (IRA) / Infrastructure Investment and Jobs Act (IIJA) in Docket 240013 posted on 5/03/2024.	Pacific Power shared that it has reviewed the UTC's policy statement. The Integrated Resource Planning team presented IRA/IIJA materials during the June 2024 Equity Advisory Group Meeting .
WA	Equity Advisory Group (EAG)	June 2024	Docket UE-230172 Stipulations	Regarding Pacific Power's Low-Income Working Sessions the Sustainable Living Center of Walla Walla expressed that they would like direct recommendations from subject matter experts.	Pacific Power acknowledged the feedback provided and has incorporated it into its low-income working sessions approach.
WA	Equity Advisory Group (EAG)	June 2024	LIBA Updates	Regarding Pacific Power's Low-Income Working Sessions, The Energy Project suggested regular hour-long meetings in addition to the standing monthly meetings.	Pacific Power acknowledged the feedback provided and established hour-long weekly sessions over the course of two months to begin to approach the low-income work.
WA	Equity Advisory Group (EAG)	June 2024	Docket UE-230172 Stipulations	In a facilitated discussion, Pacific Power asked it Equity and Low-Income Advisory Groups, <i>"How do you perceive reaching consensus?"</i> Blue Mountain Action Council believes consensus should be viewed as everyone being heard versus everyone agreeing. Northwest Community Action Center suggested members vote to reach consensus but does not believe it is ideal. Ideally, the group would have more training opportunities, time, and resources. SonBridge suggested taking temperature checks during heavy discussion.	Pacific Power acknowledged all the feedback provided and will work on implemented a strategy that incorporates as much advisory group member feedback as it can. Pacific Power expressed gratitude for the insight and will ensure everyone has the opportunity to weigh in should they want it.
WA	Equity Advisory Group (EAG)	June 2024	Energy Efficiency Pilot Programs	Pacific Power asked its Equity Advisory Group members to share their thoughts on joint versus workgroup sessions per energy efficiency topic. The Asian Pacific Islander Coalition would like to see a workshop highlighting customers' use of efficiency programs to better inform community members and provide contacts.	Pacific Power acknowledged the feedback provided and will continue to explore potential areas to offer more energy efficiency learning opportunities.

WA	Equity Advisory Group (EAG)	July 2024	Changes to Billing Logic	Regarding Pacific Power's Low-Income stipulation considerations, the Asian Pacific Islander Coalition advocated against changing the billing logic, less benefits to low-income = a less successful program. In general, Low-Income Bill Assistance (LIBA) programs should be combined with business/financial literacy programs to teach empower community members to self advocate.	Pacific Power acknowledged the feedback provided and is committed to providing equitable benefits to low-income households. Pacific Power will keep all feedback top of mind as it considers the low-income stipulation items.
WA	Equity Advisory Group (EAG)	July 2024	Changes to Billing Logic	The Asian Pacific Islander Coalition expressed the need for more cash accepting pay stations in communities. The Blue Mountain Action Council echoed the concern that customers are unable to pay bills locally using cash.	Pacific Power acknowledged the feedback provided and will work with its teams internally to ensure there are not access gaps and that there are cash payment pay stations available within each community the Company services. Pacific Power is committed to better understanding existing coverage gaps. Should updates become available, the Pacific Power will follow up with its Equity Advisory Group.
WA	Equity Advisory Group (EAG)	July 2024	Customer Generation Programs / Net Metering	The Asian Pacific Islander Coalition advocated against ending net metering and petitions against the cap. Would instead like Pacific Power to further research the income levels of those on the net metering program. Also, urges Pacific Power to research repair services for damage by drivers under the influence.	Regarding net metering, the utility can continue enrolling customers in the net metering program, but other programs must also be evaluated. Customer generation is not going to end, the goal is to explore programs other than net metering. Regarding repair services for damage by drivers under the influence, costs incurred are the responsibility of the individual involved to settle with Pacific Power.
WA	Equity Advisory Group (EAG)	July 2024	Customer Generation Programs / Net Metering	Regarding a net metering successor program, SonBridge believes the complexity may deter participants. There needs to be proper education tied into the program rollout.	Pacific Power acknowledged the feedback provided.
WA	Equity Advisory Group (EAG)	July 2024	Customer Generation Programs / Net Metering	The Sustainable Living Center of Walla Walla suggests the company explore ways solar can benefit low-income customers in subsidized housing.	Pacific Power acknowledged the feedback provided.
WA	Equity Advisory Group (EAG)	July 2024	Customer Generation Programs / Net Metering	The Asian Pacific Islander Coalition would like more transparency around maintenance costs and contributing factors.	Pacific Power acknowledged the feedback provided and will work on providing future educational opportunities to outline customer bills and the factors that go into them.
WA	Equity Advisory Group (EAG)	July 2024	Customer Benefit Indicators	The Asian Pacific Islander Coalition suggested measuring the metrics of Customer Benefit Indicator (CBI) #2 (increase community focused efforts and investments) by the number of <i>fully functional</i> public charging stations.	Pacific Power acknowledged the feedback provided and stated it will continue to explore improvements to its Customer Benefit Indicators. Pacific Power will also review data on available public charging stations.
WA	Vulnerable Populations Workshop (VP)	August 2024	Vulnerable Population Methodology	Regarding vulnerable populations geographic tracking, Kathleen Saul asked if people on supplemental oxygen are considered in the specific metrics of vulnerable populations?	Pacific Power offered to take that into consideration and research if people on supplemental oxygen are considered as disabled.
WA	Vulnerable Populations Workshop (VP)	August 2024	Vulnerable Population Methodology	Regarding vulnerable populations geographic tracking, Charlee Thompson asked how customers with medical certificates may be incorporated into the vulnerable populations data set?	Pacific Power responded that it is accounting for hearing impairments, disabilities, low-birth weight, and cardiovascular disease under its Vulnerable Population #6 as obtained from the Washington State Department of Health. However, there is not any data for customers with medical certificates. Pacific Power offered to research medical certificates and circle back.
WA	Vulnerable Populations Workshop (VP)	August 2024	Vulnerable Population Methodology	Regarding vulnerable populations category number 17 (people experiencing homelessness) and the lack of homelessness data at the census tract level, Elijah Cetas suggested obtaining data from homeless shelters.	Pacific Power acknowledged the feedback provided and expressed it will continue to explore different data sources as it refines its approach.
WA	Vulnerable Populations Workshop (VP)	August 2024	Facilitated Discussion Question: Do the vulnerability factors considered in the proposed geographic analysis reflect the sensitive factors that need to be accounted for?	Elijah Cetas suggested accessing data surrounding whether people have heating and cooling systems. Mr. Cetas also shared a count for the number of unhouseed individuals that the Washington Chamber of Commerce shares by county.	Pacific Power shared it is conducting an analysis to ensure data is usable.
