

RULE NO. 2.1

DESCRIPTION OF SERVICE

A. GENERAL VOLTAGE AND PHASE SPECIFICATIONS

Electric service furnished under this tariff will be alternating current, 60 hertz, single or three-phase, at one of the nominal standard voltages given below. This tariff contains specific charges and billing adjustments for standard primary voltage metering and delivery.

1. Secondary Voltage:

a. Standard Voltages:

Single-phase, 120 volt, 2-wire, grounded
Single-phase, 120/240 volt, 3-wire, grounded
Single-phase, 240/480 volt, 3-wire, grounded

Three-phase, 120/208 volt, 4-wire, grounded, wye
Three-phase, 277/480 volt, 4-wire, grounded, wye

b. Alternate Voltages:

Under certain conditions, at the option of Company, three-phase, 120/240 volt, 4-wire, grounded, delta, will be provided. Existing services of other voltages will be maintained to the extent deemed practical by the Company; and, when changes are required, service will be provided at one of the standard voltages.

c. Secondary delivery limitations:

Company, at its option, may limit the maximum or minimum load served at any of the above secondary voltages through a single point of delivery to a size commensurate with the capacities of transformers of that voltage designated as a Company Standard.

2. Primary Voltage:

a. Standard Primary Voltages are 7,200/12,470, 12,000/20,800, and 19,900/34,500 volt, 4-wire, grounded. Three-phase or single-phase metering points can be provided.

b. There are other primary voltages in use by Company including 2,400/4,160 volt, wye. All primary voltages are limited to the voltages on the Company's local distribution lines and are subject to future conversion to the standard voltages listed in "a." above.

c. Primary or greater voltage delivery is subject to local availability of those voltages, any special conditions and restrictions that Company may determine to be necessary, and the Customer signing a written contract.
