

PARTIAL REQUIREMENTS SUPPLY SERVICE

Page 1

Available

In all territory served by the Company in the State of Oregon.

Applicable

To Large Nonresidential Consumers receiving Delivery Service under Schedule 47.

Energy Charge

The Energy Charge is comprised of the following:

Baseline Energy

Baseline Energy shall be charged at the applicable Energy Charge under Supply Service Schedule 201 or Schedule 220, as appropriate and in accordance with the Applicable section of Schedule 201 or Schedule 220. For Energy supplied in excess of Baseline Energy, the Scheduled Maintenance Energy and/or Unscheduled Energy charges will apply except for Energy supplied pursuant to other replacement power services approved by the Commission and provided by the Company.

Usage on an hourly basis up to and including the Baseline Demand as specified in Schedule 47 will be considered Baseline Energy.

Scheduled Maintenance Energy

Scheduled Maintenance Energy shall be charged at the applicable Supply Service Schedule 201 or Schedule 220, as appropriate and in accordance with the Applicable section of Schedule 201 or Schedule 220.

Scheduled Maintenance Energy is Energy prescheduled for delivery to serve the Consumer's load normally served by the Consumer's own generation (i.e., above Baseline Energy). Scheduled Maintenance must be prescheduled at least 30 days before delivery for a time period mutually agreeable to the Company and the Consumer. If resource, market, or other system conditions deviate significantly from expected conditions at the time the Company accepted the customer's request for Scheduled Maintenance Energy, the Company may cancel Scheduled Maintenance Energy at any time with seven days notice prior to the beginning of a Scheduled Maintenance period.

If canceled, Company will make its best effort to reschedule Scheduled Maintenance Energy. For this event, Consumer will be required to submit a revised preschedule, but the 30 day advance notice requirement will be waived.

Scheduled Maintenance Energy may be taken for two events per calendar year. At the discretion of the Company the number of Scheduled Maintenance Energy events may be extended. Scheduled Maintenance Energy offerings shall not exceed a total of 31 days per calendar year.

(continued)

Energy Charge (continued)

Unscheduled Energy

Any Electricity provided to the Consumer that does not qualify as Baseline Energy or Scheduled Maintenance Energy shall be Unscheduled Energy and priced at a daily Rate consisting of the Intercontinental Exchange Mid-Columbia Firm Electricity Price for Heavy Load Hours (HLH) and Light Load Hours (LLH) (ICE Mid-C Firm Index) plus 0.14¢ per kWh, plus the adjustment for Losses.

HLH are between 6:00 a.m. and 10:00 p.m. Pacific Prevailing Time (PPT) Monday through Saturday excluding North American Electric Reliability Council (NERC) holidays. LLH are all remaining hours.

The Company may request that a Consumer taking a significant amount of Unscheduled Energy during more than 1,000 hours during a calendar year provide information detailing the reasons that the generator was not able to run during those hours in order to determine the appropriate Baseline Demand.

Losses

Losses shall be included by multiplying the applicable Energy Charge by the following adjustment factors:

Transmission Delivery Voltage	1.03503
Primary Delivery Voltage	1.06294
Secondary Delivery Voltage	1.07965

Special Conditions

Special conditions contained in Delivery Service Schedule 47 apply to this Schedule.

Rules and Regulations

Service and rates under this Schedule are subject to the General Rules and Regulations contained in the tariff of which this schedule is a part and to those prescribed by regulatory authorities.
