

TURN PUMPS INTO *profit*

With Pacific Power's improved irrigation bill credit savings program

Pacific Power's Irrigation Load Control (ILC) program is a peak energy reduction program offered to eligible irrigators to help meet our customers' peak energy requirements.

HOW DOES IT WORK?

Easy Enrollment

Join the ILC program in just a few simple steps. Enroll by email or SMS text and enjoy worry-free savings.

Meter Installation

Hardware installation is quick and free! Our team will arrange a time and handle everything for you.

Automatic Savings

Earn bill credits while operating during peak hours. Incentives are applied directly to your bill at the end of each season.

Significant Bill Credits

Peak Runtime Hours	Reported Peak Run Time Percentage (Weekdays Only, 2:00p.m.-9:00p.m. June 2nd through August 15th)							
	113	151	189	227	265	302	340	378
Motor use (measured kW)	30%	40%	50%	60%	70%	80%	90%	100%
25.5	\$230 - \$500							
42.2			\$500 - \$1,000					
63.3					\$1,000 - \$2,000			
84.4							\$2,000-\$3,000+	
105								

New for 2025

- Minimum of 4 hours advanced notification for all load management events
- Earn Pacific Power bill credits of up to \$45 per kW while operating pumps during peak run hours
- Maximum of 3 events per week
- Events become voluntary on August 18th

"We have participated in this program from the very beginning and only have good things to say about the program. The people have been so helpful and extremely responsive to any concerns and/or questions we may have had. We have been extremely pleased with the program."

Marlene Bles, Sprague River, OR

To enroll now for this season, contact us or scan the QR code to submit your program enrollment request.

TURN PUMPS INTO *profit*

With Pacific Power's improved irrigation bill credit savings program

Participation Is Easy

Connected Energy's load control and monitoring devices are installed on your enrolled pumps to automate the energy reduction process when events are called.

In addition to receiving these benefits, participants also help improve the efficiency and reliability of the electric grid.

Who can participate in the ILC program?

The Irrigation Load Control program is open to Pacific Power irrigation customers in Oregon served on Schedules No. 41 or 48, and Washington on Schedule No. 40, who can temporarily reduce operation of electric irrigation pumps during periods of peak service demand.

Why should i participate in the ILC program?

Participating growers can earn irrigation credits of up to \$45 per kW while operating pumps on weekdays between 2 p.m. and 9 p.m. In addition to receiving these benefits, participants also increase the efficiency and reliability of the electric system.

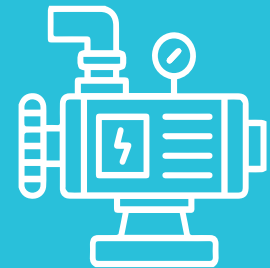

What if i can't participate in an event due to dry conditions or other operational factors?

We understand that growing conditions can change dramatically year-to-year. If conditions require that a customer continue to irrigate during periods when load management events are called, a customer may choose to opt out of the individual event or for the entire season. Opting out of individual events will reduce the value of earned bill credits.

What equipment will be installed?

Designed specifically for irrigation pumps, the advanced direct load control device is a proven technology that thousands of growers have used.

Program qualification requirements

To qualify for participation, pumps must be greater than 25 horsepower.

What if I have a question once I am enrolled?

If the question or issue is related to the Irrigation Load Control Program, call Connected Energy's irrigation support hotline at 855-664-FARM (3276) or via email at pacificpowerilc@connectedenergy.com.

If the question or issue is related to any other Pacific Power program, service, or your utility bill, please contact Pacific Power Customer Service at 1-866-870-3419 or visit PacificPower.net.
