Washington Meter Aggregation Requirements

From our Washington Net Metering Tariff (Schedule 135):

Upon the Customer's request, the Company shall aggregate for billing purposes the meter that is physically attached to the net metering system ("designated meter") with one or more meters ("aggregated meter") provided that the total load of the net metering system does not exceed one hundred kilowatts. Meters so aggregated shall not change rate schedules due to meter aggregation. For Customers who choose to participate in meter aggregation, kilowatt-hour credits earned by a net metering system during the billing period first shall be used to offset energy supplied to the designated meter by the Company. Any additional excess kilowatt-hour credits earned by the net metering system, during the same billing period, shall then be credited equally by the Company to all remaining aggregated meters located on all premises of the Customer at the designated rate of each aggregated meter. The Customer shall be billed an Aggregation Basic Charge for each aggregated meter. The Aggregation Basic Charge shall consist of an additional basic charge or load size charge, as applicable, equal to the basic charge or load size charge in the schedule under which the aggregated meter is billed for all schedules.

Designated Meter: (meter physically attached to the generation facility)	
Meter Number	

Aggregated Meter(s):*	
Rank	Meter Number
#1	
#2	
#3	
#4	

*Meters subject to the same rate schedule as the designated meter must be ranked higher than any other meter. If you wish to aggregate additional meters please attach a separate sheet with meters listed in rank order.

By completing and returning this form to Pacific Power, I confirm the above meter aggregation rank order. I understand that the terms of my selection are subject to any future changes directed by legislature, the WUTC, or applicable law. I understand it may take up to 60 days for this request to take effect.
