

FLEET MAKE-READY PILOT PROGRAM

Embrace the future of sustainable transportation by transitioning your fleet to electric vehicles. Our electric vehicle infrastructure pilot program can help pay for your project.

Move ahead

Shifting your fleet to electric vehicles saves you money, benefits the environment and positions your business as a leader. Boost your bottom line by paying less for fuel and vehicle maintenance costs.

Receive a custom incentive

- Fund your electric vehicle service equipment infrastructure costs, including design, permitting and construction costs.
Note: The custom incentive does not cover the cost of charging equipment.
- Incentives are paid in two milestone installments.

Electrify your fleet

- Review the program eligibility requirements at PacificPower.net/Fleet
- Gather utility account information and ensure that you have the business or property owner information.
- Make sure to have invoices for your electric vehicles and prepare to include them when submitting your application.

Demonstrate environmental stewardship

Transition to an electric fleet to reduce your environmental footprint, meet your sustainability goals and contribute to improved air quality.

Let us help you get started

To learn more and apply, please visit PacificPower.net/Fleet

Not sure where to start? We also offer technical assistance through an on-site feasibility analysis and customized technical fleet advising to help you evaluate your options and costs.
