

Questions and Answers Regarding the 2025 Grant Cycle

Last Update: 3/3/2025

Please find our responses below to assist in your application process. As we receive additional questions, we will add your questions to this document.

Generally Applicable Questions

Q: Will Pacific Power meet with our project team to discuss how to strengthen the application?

A: No, unfortunately we have limited capacity to meet with all prospective applicants. Instead, we would advise you to carefully consider the information provided, including the evaluation criteria.

Q: What makes a strong application?

A: Generally, we are looking for projects that are ready to move forward into implementation, have a financial commitment from other sources, and have a plan to mitigate potential challenges that may arise. For example, if a project proposes to install an EV charging station, projects that have sought [technical assistance](#) and/or received multiple bids will score higher than projects that cannot clearly demonstrate the cost breakdown in their budget.

We also look for projects that can clearly demonstrate direct community benefits and represent a mix of diverse awards both in terms of project type and geographical diversity.
