

## Electric Vehicle Charge at Home Qualified Products List

All chargers must be hardwired.

A few level 2 chargers have been removed from the residential qualified products list. For more information about this update, please refer to our [Frequently Asked Questions](#). Some qualifying chargers may have different model numbers if you purchase the product from websites other than the manufacturer website. If you have any questions, please contact us at [plugin@resource-innovations.com](mailto:plugin@resource-innovations.com).

Tesla EV chargers do not qualify for the pilot at this time. Tesla does not currently produce any demand-response-enabled EV chargers. All Qualified Products work with Tesla using a J1772 Charging Adapter. Tesla vehicles purchased from Tesla have the option to add a J1772 Charging Adapter. Please ensure that the use of the adapter conforms with your local and national codes, standards, regulations, or laws.
