Notes for food service equipment incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Demand controlled kitchen ventilation on exhaust hoods required by or used to comply with the applicable version of the energy code are not eligible for incentives.
3. All food service equipment measures are available in normal replacement or new construction applications except where measure application type is specified.
4. Anti-sweat heater controls incentives are not eligible for multiplex systems majorly upgraded or installed after July 1, 2014. This measure cannot be used in conjunction with new refrigeration display case with doors or with special doors with low/no anti-sweat heat on low-temperature display cases.
5. Ultra low temperature freezer measure is only eligible in the following existing building types: education – university, health/medical – hospital, manufacturing – biotech, and manufacturing – pharmaceuticals.
6. Used or rebuilt food service equipment is not eligible for an incentive.
