Inspections and analysis: Participant agrees to cooperate with Pacific Power and its consultants to conduct energy analysis and inspections at the participant's site. Pacific Power reserves the right to inspect qualifying equipment/energy management measures, which may include a telephone survey, site visit, and/or the installation of temporary monitoring equipment at any time up to 36 months after installation for quality control or program performance evaluations.

savings. Participant shall independently evaluate any advice or direction given by Pacific Power or its consultants related to the estimates of electricity savings or the cost, selection or installation of qualifying equipment/energy management measures. In no event will Pacific Power or its consultants be liable for the failure of the participant to achieve its expected amount of energy savings, for any personal injury or harm to participant's facilities of any kind, or for any incidental or consequential damages of any kind including hazardous material identification in connection with installation or inspection of qualifying equipment and energy management measures. Pacific Power is not responsible if a third party provides inaccurate information about the amount and/or conditions of the actual incentive and Pacific Power will not pay incentives for equipment that is mislabeled or misrepresented by third parties regarding incentive qualifications.

Incentive offer: The incentive offer is an estimate. The final incentive will be based on actual electric savings and approved actual project costs incurred by the participant for implemented approved energy efficiency measures. Participant agrees to provide any reasonable documentation to allow Pacific Power to determine electric savings and actual costs incurred. To the extent that Pacific Power determines (at its sole discretion) that any of the recommended measures have not been installed and commissioned in a satisfactory manner, participant shall receive a reduced incentive, if any, based on the inspection and verification of installed and commissioned measures.

Incentive repayment obligation: If Participant terminates a material portion of its electric service requirements, or a material portion of its electric service requirements is transferred from Pacific Power to a new electric service provider, for Participant's Facility within 60 months of the date of the final incentive payment, and the Facility remains in operation, Participant is obligated to repay the final incentive to Pacific Power within 30 days of written request. The repayment ("Repayment") will be determined as follows: $\text{Repayment} = \text{final incentive} \times (60 - \text{Savings Delivery Term}) / 60$, where Savings Delivery Term = number of months between the month the Final Incentive payment was made and the month the Facility terminated a material portion of its electric service. For determining the Repayment, the dates will be the first day of the month in which they occur.

Transfer of environmental attributes: Participant hereby transfers to Pacific Power all "Environmental Attributes" attributable to the installation of the qualifying equipment or its operation. Environmental Attributes include any and all credits, benefits, emissions reductions, offsets and allowances, howsoever entitled, resulting from the avoidance of the emission of any substance to the air, soil or water at or by the company's generating facilities, through reduced generation of energy or other savings or offsets on account of the qualifying equipment. Participant will not claim ownership of any Environmental Attributes. As long as participant at the same time states the installation of the qualifying equipment was made possible with funding from Pacific Power, participant may claim that it is facilitating the production of the Environmental Attributes attributable to the qualifying equipment.

For more information, please request a copy of our privacy policy or find it on our website at www.pacificpower.net/privacy.
