

Cowiche Growers improved efficiency and cut costs with the help of Pacific Power incentives. Pictured: Pacific Power Energy Efficiency Project Manager Hallie Gallinger and Cowiche Growers Operations Manager Jose Garcia.

TACKLE YOUR ENERGY-SAVINGS PRIORITIES. WATTSMART® BUSINESS MAKES IT EASY

Every business is unique. That's why Wattsmart Business has flexible, streamlined programs built around your needs.

- 1. Lower your energy bills so your business can grow faster.
- 2. Improve comfort and productivity with efficiency upgrades
- 3. Get incentives for system upgrades and new equipment.
- 4. Shrink your environmental footprint

WATTSMART BUSINESS VENDORS

Wattsmart Business Vendors are local companies—people you may already know. They understand our requirements and processes and can show you the financial benefits of energy upgrades. Premium Vendors specialize in lighting and are identified through their high-quality participation in Wattsmart Business.

Find a vendor on our website.

What's next on your to-do list?

Here are just a few of the incentives available through Wattsmart[®] Business. Discover even more at PacificPower.net/WAincentives.

SAMPLE OF LISTED INCENTIVES

INCENTIVE LIST	ENERGY-EFFICIENT MEASURES	WATTSMART BUSINESS INCENTIVE*
Interior lighting — retrofits	Full fixture replacement with advanced controls	\$0.46/kWh
Motors	HVAC VFD ≤ 100 hp fans and pumps	\$81/hp
Heating and cooling	High-efficiency Packaged Terminal Heat Pumps (PTHP)	\$62/ton
Food service equipment	Commercial dishwasher	\$125 to \$1,250
ечиртен	Electric griddle	\$400
Irrigation	Irrigation pump VFD	\$0.28/kWh annual energy savings
Farm/Dairy	Automatic milker takeoffs (retrofit only)	\$294 each
Compressed air	VFD controlled compressor ≤ 75 hp	\$0.28/kWh annual energy savings

^{*}Incentives are subject to change and approval by Pacific Power. For some measures, incentives are capped at 70% of energy efficiency project costs, and incentives will not be available to reduce the project's simple payback below one year. To see complete incentive lists and details, please visit PacificPower.net/WAincentives.

Help is available for small improvements and routine maintenance, too. Instant incentives for LED lighting are available at the point of purchase from participating instant incentive distributors. Incentives cover up to 70% of the cost of qualifying lamps. Find a participating distributor at BeWattsmart.com.

When funds are unavailable from within your organization, securing financing may be your best option. Pacific Power partners with National Energy Improvement Fund, specialists in financing energy-efficiency projects, to help in these situations. This financing solution is provided as a convenience, and customers are free to use any lender of their choice. To learn more, visit PacificPower.net/Financing.

CUSTOM ANALYSIS AND INCENTIVES

For custom projects beyond the scope of typical upgrades on the incentive lists, our energy experts can help evaluate options, estimate potential savings, and help you make a Wattsmart choice before you make a purchase.

	INCENTIVE	INCENTIVE CAPS*
Custom incentives for qualifying measures not on the incentive list	\$0.28 per annual kilowatt-hour savings	70% of project costs and one-year simple payback

^{*}The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.

Incentives for the most common new construction upgrades can be found on our lists. If you plan to install unique systems – not on the list – contact us early in your process for a custom analysis.

PUTTING WATTSMART BUSINESS TO WORK FOR YOU

For the bulk of your typical upgrades, you can apply post-purchase either on your own or through a Wattsmart Business Vendor. Lighting retrofits and custom projects require pre-authorization and may require an upfront inspection.

Here is the path to participation for projects like these:

- YOU SUBMIT AN APPLICATION: After you identify the project(s), your first step is to submit a general application. Applications can be found at BeWattsmart.com.
- 2. WE PROVIDE A PRE-INSPECTION /ENERGY ANALYSIS REPORT:

 Before you remove existing equipment, we may need to inspect it to establish an energy baseline. Our inspection will identify efficiency options and help you understand the financial benefits of your investment. It is crucial we do this before you purchase anything new.
- YOU SIGN AN INCENTIVE OFFER: Sign an incentive offer before you
 purchase equipment. Without a signed offer, you may not be able to receive
 an incentive.
- 4. **INSTALL YOUR PROJECT:** If your project changes, contact us before the completion date in your incentive offer.
- 5. WE PROVIDE A POST-INSPECTION: We may need to confirm that the new equipment has been installed and is operational. It can be a simple inspection of installed lighting or may require more formal savings verification. The requirements will be in your energy analysis.
- 6. YOU RECEIVE YOUR CASH INCENTIVE: Congratulations! Within 45 days of final inspection, savings verification and/or receipt of all necessary cost documentation, you will receive your incentive.

SUPPORT FOR SMALL BUSINESSES

Pacific Power's lighting incentive program helps small businesses save energy and money. This incentive covers some of the most common lighting upgrades, such as LEDs and lighting controls.

Participate in five easy steps:

- Schedule a free facility assessment with an Approved Contractor. Contact us if you need help finding an Approved Contractor.
- Review and approve lighting proposal and sign incentive application. The Approved Contractor will pass on 100% of the eligible incentive as a credit on their invoice to you and take care of the paperwork.
- The Approved Contractor will install your new lighting.
- 4. Pay the Approved Contractor.
- 5. Enjoy energy savings and better lighting!

Looking for non-lighting incentives?
We have enhanced non-lighting incentives for small businesses too. Visit

BeWattsmart.com for more.

Beyond incentives

We have additional options for larger businesses that need more than just great cash incentives for capital projects, including tailored guidance and support for the day-to-day energy management of your systems.

ENERGY MANAGEMENT

If you are interested in partnering with Pacific Power to improve energy management in your facilities or industrial processes, contact us for our expertise and a potential incentive of \$0.025 per kilowatt-hour (kWh) for verified savings. Contact your account manager, Wattsmart Business project manager or Pacific Power today to get started.

ENERGY PROJECT MANAGER CO-FUNDING

Pacific Power can provide co-funding for you to retain, hire or contract with a dedicated Energy Project Manager. To participate, we will need to identify projects that result in at least 1,000,000 kWh in energy savings through the Wattsmart Business program. You will receive co-funding of an additional \$0.025/per kWh saved, up to 100% of your Energy Project Manager's salary. To participate, contact your account manager, Wattsmart Business project manager or Pacific Power today.

LEARN MORE AND GET STARTED

- Call us toll free 1-855-805-7231
- Email wattsmartbusiness@pacificpower.net
- Apply online at **BeWattsmart.com**

Contact us early-before purchasing new equipment-to make sure you're taking full advantage of the valuable incentives available to you.

Pictured from left: Hallie Gallinger, Pacific Power Energy Efficiency Project Manager; Wendall Brown, Northwest Harvest Yakima Distribution Center Director; Thomas Reynolds, Northwest Harvest CEO; James Gibbs, Northwest Harvest Chief of Staff; and Toni Petty, Pacific Power Regional Business Manager.

NORTHWEST HARVEST

Northwest Harvest upgraded their Yakima distribution center with customized energy-efficient refrigeration, optimizing productivity and reducing energy usage. The nonprofit organization received over \$220,000 in Wattsmart Business incentives to make the improvements, which will save \$54,000 in energy costs annually.

Non-general Illuminance	LED case lighting – freezer case	qualitfied equipment list.	\$14/linear foot		
	Refrigerated case occupancy sensor	Installed in existing refrigerated case with LED lighting	\$1.50/linear foot		
	Full fixture replacement	With or without controls upgrade	\$0.22/kWh		
Controlled Environment		TLED Lamp with or without controls upgrade	\$0.10/kWh		
Agriculture (CEA)	Lamp replacement	Other Lamp-only Replacements with or without controls upgrade	See Mid-market incentive table		
Custom Lighting	Custom	Not listed above	\$0.13/kWh		

^{*}Incentive Offer is required to reserve bonus funds. To receive the customer bonus incentive, applicable measures must be installed with final application submitted by November 30th, 2025. The program bonus structure, including deadlines and full terms and conditions, is available on the program website and may be modified at any time.

Notes for lighting retrofit incentives:

- 1. To be eligible for the incentives listed, the new lighting system must use less energy than the existing lighting system replaced or the baseline lighting system as determined by Pacific Power. To be eligible for an incentive for a system with controls, the new controls must save energy relative to existing controls.
- 2. Incentives are capped at 70% of energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy efficiency project costs are subject to Pacific Power approval.
- 3. Incentives listed as \$/kWh are paid per kWh annual energy savings as determined by Pacific Power.
- 4. Eligible retrofit lighting equipment is defined in qualified equipment lists posted in the Washington lighting catalog.
- 5. A complete list of lighting equipment not eligible for retrofit incentives is available in the Washington lighting catalog.

INCENTIVES FOR LIGHTING (NEW CONSTRUCTION/MAJOR RENOVATION) **CUSTOMER** CATEGORY **MEASURE ELIGIBILITY REQUIREMENTS INCENTIVE** Troffer \$14/fixture Linear ambient \$14/fixture Product must be listed on qualified equipment list. High bay \$30/fixture Products must be installed in facilities Other fixtures (not listed above) \$0.74 /fixture wattage Interior Lighting where energy code applies. Advanced networked \$1.20/W controlled lighting controls Products must be installed in facilities where \$0.10/kWh annual energy Custom interior lighting energy code does not apply savings Controlled Environment Product must be listed on qualified LED fixture \$0.12/kWh Agriculture (CEA) equipment list.

Notes for new construction/major lighting incentives:

- 1. Project cost caps of 70% and one-year simple payback caps apply to new construction and major renovation projects that are not subject to state energy code. The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.
- 2. Lighting equipment installed to comply with the applicable version of the state energy code, but not exceeding that code, is not eligible for incentives. Lighting equipment that exceeds the applicable version of the state energy code is eligible for incentives.
- 3. Eligible lighting equipment is defined in qualified equipment lists in the Washington lighting catalog.

	INCENTIVES FOR MOTORS						
EQUIPMENT TYPE	SIZE CATEGORY	SUB-CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE	LIMITED TIME ADDITIONAL CUSTOMER BONUS INCENTIVE*		
Variable Frequency Drives (HVAC fans and pumps)	≤ 100 horsepower	HVAC fans and pumps	See note 2	\$81/horsepower	\$16/horsepower		
Electronically Commutated Motor (ECM) – Retrofit only	Electronically Commutated > 1 and < 10 hp. HVAC fans and pumps Must meet \$93/horsepower \$19/horsepower						

^{*}To receive the customer bonus incentive, applicable measures must be installed with final application submitted by November 30th, 2025. The program bonus structure, including deadlines and full terms and conditions, is available on the program website and may be modified at any time.

Notes for motor incentives:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
- 2. Throttling or bypass devices, such as inlet vanes, bypass dampers, three-way valves or throttling valves must be removed or permanently disabled to qualify for HVAC fan or pump VFD incentives. VFDs required by or used to comply with the applicable version of the energy code are not eligible for incentives. Savings will only be realized for installations where a variable load is present.

hp = Horsepower HVAC = Heating Ventilating and Air Conditioning NEMA = National Electrical Manufacturers Association VFD = Variable Frequency Drive

INCENTIVES FOR NEW CONSTRUCTION/MAJOR RENOVATION HVAC EQUIPMENT MEASURE ELIGIBILITY REQUIREMENTS CUSTOMER INCENTIVE Systems must be installed in office, retail, library, education, and multi-family occupancies where the applicable state energy code is Washington State Energy Code 2018 or 2021 and the Total System Performance Ratio (TSPR) requirement applies \$0.18/kWh The TSPR must exceed that of the standard reference design specified by the applicable version of the Washington State Energy Code

Notes for New Construction/Major Renovation HVAC Equipment incentive table

- 1. For HVAC systems serving occupancy types not subject to or exempt from TSPR requirement, see the HVAC Equipment Incentive Table or the Other HVAC Equipment and Controls Incentive Table below.
- 2. Incentives listed as \$/kWh are paid per kWh annual energy savings as determined by Pacific Power.

HVAC = Heating, Ventilation and Air-Conditioning TSPR = Total System Performance Ratio

INCENTIVES FOR HVAC EQUIPMENT (continued) MINIMUM EFFICIENCY REQUIREMENT & **CUSTOMER INCENTIVE** \$800/TON LIMITED TIME ADDITIONAL CUSTOMER **EQUIPMENT TYPE** SIZE CATEGORY **SUB-CATEGORY BONUS INCENTIVE**³ \$160/TON Heat Pumps, Air-Cooled, replacing electric resistance heating (Heating All sizes ENERGY STAR® certified Split system and single package and Cooling mode) (Retrofit only) (See note 3 and 7)

Notes for HVAC equipment incentives:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the size category in the above table may qualify for the listed incentive. Equipment must meet all listed efficiency requirements to qualify for the listed incentives.
- 2. PTHPs can replace electric resistive heating, which must be removed.
- 3. Incentives for heat pumps are available per ton of cooling capacity ONLY. No incentives are paid per ton of heating capacity. Heat pumps must meet both the cooling mode and heating mode efficiency requirements to qualify for per ton cooling efficiency incentives.
- 4. Equipment size categories are specified in terms of net cooling capacity at AHRI standard conditions as determined by AHRI Standard 210/240 for units < 65,000 Btu/hr, AHRI Standard 340/360 for units ≥ 65,000 Btu/hr, AHRI Standard 1230 for VRF systems and AHRI Standard 310/380 for PTAC and PTHP units.
- 5. Ground- and water-source heat pumps must meet or exceed listed efficiency requirements when rated in accordance with ISO-13256-1 to qualify for the listed incentive.
- 6. Efficiency requirements align with the Consortium for Energy Efficiency (CEE) Unitary Air-Conditioning and Heat Pump Specification or ENERGY STAR for equipment with heating sections other than electric resistance. Minimum efficiency requirements are listed on our website.
- 7. Equipment must meet CEE/ENERGY STAR part load efficiency requirements (SEER/SEER2 or IEER/IEER2). Equipment does not need to meet CEE/ENERGY STAR full load efficiency requirements (EER/EER2), as long as the part load efficiency requirement is also specified for the equipment by CEE/ENERGY STAR. If CEE/ENERGY STAR only lists full load efficiency requirements (EER/EER2), then equipment must meet this standard. Additionally, the equipment must meet or exceed state or federal full load efficiency standards, whichever is more stringent.
- 8. Incentives listed in the above table are not available for new construction and major renovation project HVAC systems serving office, retail, library, educational and multi-family occupancies that are subject to the HVAC total system performance ratio (TSPR) requirement in Washington State Energy Code 2018 or 2021. See new construction/major renovation HVAC equipment table for incentive information.

AHRI = Air-Conditioning, Heating and Refrigeration Institute
CEE = Consortium for Energy Efficiency
COP = Coefficient of Performance
EER/EER2 = Energy Efficiency Ratio
HSPF/HSPF2 = Heating Seasonal Performance Factor
HVAC = Heating, Ventilation and Air-Conditioning
IEER/IEER2 = Integrated Energy Efficiency Ratio
PTAC = Packaged Terminal Air Conditioner
PTHP = Packaged Terminal Heat Pump
SEER/SEER2 = Seasonal Energy Efficiency Ratio
VRF = Variable Refrigerant Flow

TSPR = Total System Performance Ratio

^{*}To receive the customer bonus incentive, applicable measures must be installed with final application submitted by November 30th, 2025. The program bonus structure, including dead-lines and full terms and conditions, is available on the program website and may be modified at any time.

INCEN	TIVES FOR OTH	IER HVAC EQL	JIPMENT AND CONTRO	
EQUIPMENT TYPE	SIZE CATEGORY	SUB-CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE
Evaporative Cooling	All sizes	Direct or indirect	_	\$0.07/cfm
Indirect-Direct Evaporative Cooling (IDEC)	All sizes	_	Applicable system components must exceed minimum efficiencies required by energy code	\$0.18/kWh annu energy savings (See note 2)
Chillers	All except chillers intend- ed for backup service only	Serving primarily occupant comfort cooling loads (no more than 20% of process cooling loads)	Must exceed minimum efficiencies required by energy code	\$0.18/kWh annu energy savings (See note 3)
365/366 Day Programma- ble or Occupancy-based Thermostat	All sizes in portable classrooms with mechanical cooling	Must be installed in portable classroom unoccupied during the summer months	365/366 day thermostatic or occupancy-based set back capability	\$187/thermosta
Occupancy-based PTHP/ PTAC Control (Retrofit only)	All sizes with no prior occupancy-based control	_	See note 4	\$62/controller
Evaporative Pre-cooler (Retrofit only)	_	For single air-cooled packaged rooftop or matched split system condensers only	Minimum performance efficiency of 75%. Must have enthalpy controls to control precooler operation. Water supply must have chemical or mechanical water treatment.	\$93/ton of attached cooling capacity (See note 5)
	< 5 tons			\$500
Advanced Rooftop Unit Control (Existing RTU)	≥ 5 tons and ≤ 10 tons	Must be installed on existing unitary packaged	Controls must include: - Either a supply fan VFD or multi-speed	\$2,900
	> 10 tons and ≤ 15 tons	rooftop units (no split	supply fan motor with controller that meets ventilation and space conditioning needs - Digital, integrated economizer control	\$3,900
	> 15 tons ≤ 20 tons	systems) with constant		\$5,400
	> 20 tons	speed supply fans		\$6,000
	< 5 tons		Controls must include: - Digital, integrated economizer controls that modulate based on occupancy - CO2 or occupancy- based sensor	\$350
Advanced Rooftop Unit	≥ 5 tons and ≤ 10 tons	Must be installed on		\$625
Control (Existing RTU, de-	> 10 tons and ≤ 15 tons	existing unitary packaged		\$750
mand-controlled ventilation only)	> 15 tons and ≤ 20 tons	rooftop units (no split systems)		\$875
,)	> 20 tons	5,233)		\$1,000
	< 5 tons			\$200
	≥ 5 tons and ≤ 10 tons	Must be installed on uni-	Controls must include:	\$1,400
Advanced Rooftop Unit	> 10 tons and ≤ 15 tons	tary packaged rooftop	- Either a supply fan VFD or multi-speed supply fan motor with controller that meets	\$2,000
Control (New RTU)	> 15 tons and ≤ 20 tons	units (no split systems)	ventilation and space conditioning needs	\$2,800
	> 20 tons	(See note 6)	- Digital, integrated economizer control	\$3,200
Smart Thermostat	Residential (used in a busine	<i>(4)</i>	See Home Energy Savings Program	
Connected Thermostat	Commercial		Qualified thermostat must have these capabilities: - Multiple temperature set-back schedules - Fan-mode scheduling (continuous-on versus auto mode) - Limited-duration over-rides (reverts to programming after 24 hours) - Remote (web-based) monitoring and programming - Automatic restoration after power outage - Support multiple cooling stages Thermostat must be web-connected (LAN or WAN), and remote programming must be	\$100

Notes for HVAC equipment and controls incentives:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
- 2. Incentives are paid at \$0.18/kWh annual energy savings. IDEC energy savings subject to approval by Pacific Power.
- 3. Incentives are paid at \$0.18/kWh annual energy savings. Chiller energy savings subject to approval by Pacific Power.
- 4. Controller units must include an occupancy based control and include the capability to set back the zone temperature during extended unoccupied periods and set up the temperature once the zone is occupied.
- 5. Incentives for Evaporative Pre-coolers are capped at 70% of Energy Efficiency Project Costs and incentives will not be available to reduce the Energy Efficiency Project simple payback below one year. Energy Efficiency Project Costs are subject to Pacific Power approval.
- 6. Incentives are not available for new Advanced Rooftop Unit Control required by the applicable version of the state energy code.
- 7. Incentives listed in the above table are not available for New Construction and Major Renovation project HVAC systems serving office, retail, library, educational, and multi-family occupancies that are subject to the HVAC total system performance ratio (TSPR) requirement in Washington State Energy Code 2018 or 2021. See New Construction/Major Renovation HVAC Equipment Incentive Table for incentive information.
- 8. Incentives for Advanced Rooftop Unit Control are capped at 100% of Energy Efficiency Measure Costs, which are subject to Pacific Power approval.

CFM = Cubic Feet per Minute

DCV = Demand-Controlled Ventilation

IDEC = Indirect Direct Evaporative Cooling

HVAC = Heating, Ventilation and Air-Conditioning

PTHP = Packaged Terminal Heat Pump

PTAC = Packaged Terminal Air Conditioner

TSPR = Total System Performance Ratio

For details about HVAC Check-Up incentives, visit our website.

INCENTIVES FOR HVAC CHECK-UP					
MEASURE CUSTOMER INCENTIVE LIMITED TIME ADDITIONAL CUSTOMER BONUS INCENTIVE*					
Maintenance Agreement	\$75/RTU	\$15/RTU			
Economizer	\$150/RTU	\$30/RTU			
Refrigerant	\$35/TON RTU CAPACITY	\$7/TON RTU CAPACITY			

^{*}To receive the customer bonus incentive, applicable measures must be installed with final application submitted by November 30th, 2025. The program bonus structure, including deadlines and full terms and conditions, is available on the program website and may be modified at any time.

Notes for HVAC Check-up incentives:

Incentives are capped at 70 percent of qualifying Energy Efficiency Measure Costs. Qualifying Energy Efficiency Measure Costs are subject to Pacific Power approval. HVAC Check-up incentives are available to customers implementing qualifying measures to their rooftop units (RTUs) through approved HVAC Check-up vendors. The initial assessment is free and details steps for participation.

INCE	INCENTIVES FOR BUILDING ENVELOPE (RETROFITS)					
EQUIPMENT TYPE	CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE			
Cool Roof	_	Must meet the minimum SRI specified by the Green Globes Building Certification v1.0	\$0.06/square foot			
Roof/Attic Insulation	_	Minimum increment of R-10 insulation	\$0.08/square foot			
Wall Insulation	_	Minimum increment of R-10 insulation	\$0.10/square foot			
Mindous (See notes 2.4)	Site-built	U-factor ≤ 0.30 and SHGC ≤ 0.33 (glazing only rating)	\$0.42/square foot			
Windows (See notes 3, 4)	Assembly	U-factor ≤ 0.30 and SHGC ≤ 0.33 (entire window assembly rating)	\$0.42/square foot			
Window Film	Existing Windows	See note 5	\$0.18/kWh annual energy savings (See note 5)			

Notes for building envelope retrofit incentives:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
- 2. Building must be conditioned with mechanical cooling to be eligible for building envelope incentives.
- 3. Energy performance of window assemblies and glazing products must be rated in accordance with NFRC. Site-built metal window systems must include a thermal break within the frame or other appropriate NFRC certification to qualify for incentives. Skylights are not eligible to receive incentives.
- 4. Window square footage is determined by the dimensions of the entire window assembly, not just the window glass.
- 5. Incentives for window film are calculated based on film specifications and window orientation at \$0.18/kWh annual energy savings. Energy savings subject to approval by Pacific Power.

NFRC = National Fenestration Rating Council

INCENTIVES FOR BUILDING ENVELOPE (NEW CONSTRUCTION/MAJOR RENOVATION) MINIMUM EFFICIENCY **CUSTOMER** CATEGORY **EQUIPMENT TYPE REQUIREMENT INCENTIVE** U-factor ≤ 0.30 and SHGC ≤ 0.33 (glazing Site-built \$0.42/square foot only rating) Windows (See notes 3, 4) U-factor ≤ 0.30 and SHGC ≤ 0.33 (entire Assembly \$0.42/square foot window assembly rating)

Notes for building envelope incentives for new construction/major renovation projects:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
- 2. Building must be conditioned with mechanical cooling to be eligible for envelope incentives.
- 3. Window square footage is determined by the dimensions of the entire window assembly, not just the window glass.
- 4. Energy performance of window assemblies and glazing products must be rated in accordance with NFRC. Site-built metal window systems must include a thermal break within the frame or other appropriate NFRC certification to qualify for incentives. Skylights are not eligible to receive incentives.
- 5. Equipment installed to comply with the applicable version of the state energy code, but not exceeding that code, is not eligible for incentives.

NFRC = National Fenestration Rating Council SHGC = Solar Heat Gain Coefficient

INCENTIVES FOR FOOD SERVICE EQUIPMENT					
EQUIPMENT TYPE	EQUIPMENT CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE		
	Under counter		\$125		
Commercial Dishwasher (High temperature models with electric boosters only)	Stationary rack, single tank, door type		\$500		
	Single tank conveyor	ENERGY STAR® certified	\$1,250		
	Multiple tank conveyor		\$625		
Electric Griddle	Single-sided		\$400		
Anti-sweat Heater Controls	Low-temp (freezing) cases	Technologies that reduce energy consumption of anti-sweat heaters	\$25/linear foot case length		
(Retrofit only)	Med-temp (refrigerated) cases	based on sensing humidity	\$20/linear foot case length		
On-Demand Overwrapper	Process Loads	Overwrapper must use either a mechanical or optical control system	\$200		

See Appliances and Lighting sections for additional incentives.

Notes for food service equipment incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.

	INCENTIVES FOR APPLIANCES					
EQUIPMENT TYPE	EQUIPMENT CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE			
	Residential (used in a business)	See Home Energy Savings Program				
High-Efficiency Clothes Washer	Commercial front-load (must have electric water heating and/or electric clothes dryer)	ENERGY STAR® certified	\$300			
Heat Pump Water Heater	Residential (used in a business)	NEEA Tier 3 or higher	\$900			
Heat Pump Clothes Dryer	Residential (used in a business)	Can Harry Francisco Sariners Drawners				
Hybrid Heat Pump Clothes Dryer	Residential (used in a business)	See <u>Home Energy Savings</u> Program				

See Appliances and Lighting sections for additional incentives.

Notes for appliance incentives:

- 1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
- 2. Equipment must meet the efficiency rating standard that is in effect on the date of purchase.
- 3. Refer to Pacific Power's Home Energy Savings program for efficiency requirements and incentives for listed residential appliances used in a business.
- 4. Additional incentive may be available to an approved Wattsmart Business Vendor contractor involved in the installation of an eligible heat pump water heater.

Please see the Home Energy Savings program.

INCEN ⁻	INCENTIVES FOR OTHER ENERGY EFFICIENCY MEASURES					
EQUIPMENT TYPE	REPLACE	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE			
Engine Block Heater Control	No existing control	Controller must function thermostatically and be compatible with 110-volt, single-phase resistance immersion heaters. In addition, controller must be permanently installed at the participant site or on a vehicle. This incentive is only available for buses, delivery vehicles, and mass transit vehicles.	\$120/qualifying unit			

Notes for other energy efficiency measures:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.

IRRIGATION INCENTIVES FOR WHEEL LINE, HAND LINE OR OTHER PORTABLE WATER DISTRIBUTION SYSTEMS (RETROFIT ONLY)

IRRIGATION MEASURE	REPLACE	WITH	LIMITATIONS	CUSTOMER INCENTIVE
New rotating sprinkler replacing worn or leaking impact or rotating sprinkler	Leaking or malfunctioning impact or rotating sprinkler	Rotating sprinkler	Fixed in-place (solid set) systems not eligible. Incentives limited to two sprinklers per irrigated acre	\$0.50 each
New impact sprinkler replacing worn or leaking impact sprinkler	Leaking or malfunctioning impact sprinkler	New impact sprinkler	Fixed-in-place (solid set) systems not eligible. Incentive limited to two sprinklers per irrigated acre.	\$0.50 each
New nozzle replacing worn nozzle of same design flow or less on existing sprinkler	Worn nozzle	New nozzle (including flow-control nozzles) of same design flow or less	Flow rate shall not be increased. Fixed-in place (solid set) systems not eligible Incentive limited to two nozzles per irrigated acre.	\$1.50 each
New gasket replacing leaking gasket, including main line valve or section gasket, seal or riser cap (dome disk)	Leaking gasket	New gasket, including main line valve or section gasket, seal or riser cap (dome disk)	New gasket must replace leaking gasket. Fixed-in place (solid set) systems not eligible Incentive limited to two gaskets per irrigated acre.	\$2 each
New drain replacing leaking drain	Leaking drain	New drain, including drains on pivots and linears	New gasket must replace leaking drain. Fixed-in place (solid set) systems not eligible Incentive limited to two drains per irrigated acre.	\$2 each
New or rebuilt wheel line leveler replacing leaking or malfunctioning leveler	Replace leaking or malfunc- tioning leveler	New or rebuilt leveler	Applies to leaking or malfunctioning levelers only For rebuilds, invoice must show number of rebuild kits purchased and installed	\$1 each

IRRIGATION INCENTIVES FOR PIVOT AND LINEAR WATER DISTRIBUTION SYSTEMS (RETROFIT ONLY)				
IRRIGATION MEASURE	REPLACE	WITH	LIMITATIONS	CUSTOMER INCENTIVE
Pivot and linear sprinkler package replacement, high pressure	Worn impact sprinkler	New impact sprinkler or rotator, including nozzle	Design flow shall not be increased	\$7 each
Pivot and linear sprinkler package replacement, MESA	Worn low pressure sprinkler and regulator	New low pressure sprinkler, including nozzle and regulator	Applicable to MESA-configured center pivots and linears. Design flow rate shall not be increased.	\$4 each
Pivot and linear sprinkler package replacement, LESA/ LEPA/MDI	Worn low pressure sprinkler and regulator	New low pressure sprinkler, including nozzle and regulator	Applicable to LESA/LEPA/MDI configured center pivots and linears. Design flow rate shall not be increased.	\$2 each
Pivot and linear upgrade from high pressure to MESA	Conversion of center pivot or linear move from high pressure (impact) sprinklers on top	Conversion of center pivot or linear move to MESA configuration	Incentive is per drop. Design flow rate shall not be increased.	\$7 each
Pivot and linear upgrade from high pressure to LESA/ LEPA/MDI	Conversion of center pivot or linear move from high pressure (impact) sprinklers on top	Conversion of center pivot or linear move to LESA/LEPA/MDI configuration	Incentive is per drop. Design flow rate shall not be increased.	\$7 each
Pivot and linear upgrade from MESA to LESA/LEPA/MDI	Conversion of center pivot or linear move from MESA configuration	Conversion of center pivot or linear move to LESA/LEPA/MDI configuration	Incentive is per drop. Design flow rate shall not be increased.	\$5 each

IRRIGATION INCENTIVES FOR ANY TYPE OF SYSTEM (RETROFIT OR NEW CONSTRUCTION, INCLUDING NON-AGRICULTURAL IRRIGATION APPLICATIONS)				
IRRIGATION MEASURE	REPLACE	WITH	LIMITATIONS	CUSTOMER INCENTIVE
Irrigation pump VFD	_	Add variable frequency drive to existing or new irrigation pump	1. Pumps serving any type of irrigation water transport or distribution system are eligible — wheel lines, hand lines, pivots, linears, fixed-in-place (solid set). 2. Both retrofit and new construction projects are eligible. 3. Incentives are capped at 70% of energy efficiency project costs, and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy savings and energy efficiency project costs are subject to Pacific Power approval.	\$0.28/kWh annual savings

Notes for irrigation incentives:

- $1. \ \, \text{Equipment that meets or exceeds the requirements above may qualify for the listed incentive.}$
- 2. Except for the pump VFD measure, incentives listed here are available only for retrofit projects where new equipment replaces existing equipment (i.e. new construction is not eligible).
- 3. Except for the pump VFD measure, equipment installed in fixed-in-place (solid set) systems is not eligible. Incentive is limited to two units per irrigated acre.

INCENTIVES FOR FARM AND DAIRY ENERGY EFFICIENCY MEASURES				
EQUIPMENT TYPE	EQUIPMENT CATEGORY	MINIMUM EFFICIENCY REQUIREMENT	CUSTOMER INCENTIVE	
Automatic Milker Takeoffs (Retrofit only)	_	Equipment must be able to sense milk flow and remove milker when flow reaches a pre-set level. The vacuum pump serving the affected milking units must be equipped with a VFD. Incentive is available for adding automatic milker takeoffs to existing milking systems, not for takeoffs on a brand new system where there was none before. Replacement of existing automatic milker takeoffs is not eligible for this listed incentive but may qualify for a custom energy efficiency incentive.	\$294 each	
	12-23" diameter	Fan must achieve an efficiency level of 11 cfm/W	\$31/fan	
High Efficiency Circulating Fans (See note 2)	24-35" diameter	Fan must achieve an efficiency level of 18 cfm/VV	\$44/fan	
	36-47" diameter	Fan must achieve an efficiency level of 18 cfm/VV	\$62/fan	
	≥ 48 diameter	Fan must achieve an efficiency level of 25 cfm/VV	\$94/fan	
Heat Recovery	_	Heat recovery unit must use heat rejected from milk cooling refrigeration system to heat water. Customer must use electricity for water heating.	\$0.28/kWh annual savings	
	12-23" diameter	Fan must achieve an efficiency level of 11 cfm/W	\$56/fan	
High Efficiency Ventilation Fans (See note 2)	24-35" diameter	Fan must achieve an efficiency level of 13 cfm/VV	\$94/fan	
	36-47" diameter	Fan must achieve an efficiency level of 17 cfm/W	\$156/fan	
	≥ 48 diameter	Fan must achieve an efficiency level of 19.5 cfm/W	\$188/fan	
Milk Pre-Coolers (Retrofit only)	_	The equipment must cool milk with well-water before it reaches the bulk cooling tank.	\$0.28/kWh annual savings	
Programmable Ventilation Controllers	_	Controller must control ventilation fans based on temperature or other applicable factors such as humidity, odor concentration, etc. \$25/fan		
Variable Frequency Drives for Dairy Vacuum Pumps (Retrofit only)	_	VFD must vary motor speed based on target vacuum level. Incentive available for retrofit only (i.e. new construction and replacement of existing VFD not eligible). \$206/hp		
Potato or Onion Storage Fan VFD	_	Add variable frequency drive to existing or new fan in potato or onion storage \$219/hp		

Notes for farm and dairy incentives:

- 1. Equipment that meets or exceeds the efficiency requirements above may qualify for the listed incentive.
- 2. Fan performance must be rated by an independent testing body in accordance with the appropriate ANSI/AMCA standards.
- 3. Incentives are capped at 70% of the energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy savings and energy efficiency project costs are subject to Pacific Power approval.
- 4. Except where noted, all equipment listed in the table is eligible for incentives in both new construction and retrofit projects.

AMCA = Air Movement and Control Association International,Inc. ANSI = American National Standards Institute cfm = cubic feet per minute VFD = Variable Frequency Drive W = Watt

INCENTIVES FOR COMPRESSED AIR				
EQUIPMENT CATEGORY	REPLACE	WITH	LIMITATIONS	CUSTOMER INCENTIVE
Receiver Capacity Addition	Limited or no receiver capacity (≤ 2 gallons per scfm of trim compressor capacity)	Total receiver capacity after addition must be > 2 gallons per scfm of trim compressor capacity	 Compressor system size ≤ 75 hp, not counting backup compressor(s) Trim compressor must use load/unload control, not inlet modulation or on/off control construction projects are eligible. Systems with VFD compressor or using variable displacement compressor are not eligible 	\$3.75/gallon above 2 gallons per scfm
Cycling Refrigerated Dryers	Non-cycling refrigerated dryer	Cycling refrigerated dryer	 Rated dryer capacity must be ≤ 500 scfm Dryer must operate exclusively in cycling mode and cannot be equipped with the ability to select between cycling and noncycling mode. Refrigeration compressor must cycle off during periods or reduced demand 	\$2.50/scfm
VFD Controlled Compressor (Retrofit only)	Fized-speed compressor	≤ 75 hp VFD-controlled oil-injected screw compressor operating in system with total compressor capacity ≤ 75 hp, not counting backup compressor capacity	 Total compressor capacity in upgraded system is ≤ 75 hp, not counting backup compressor capacity. Compressor must adjust speed as primary means of capacity control 	\$0.28/kWh annual savings
Zero Loss Condensate Drains	Timer Drain	Zero loss condensate drain (See note 4)	Drain is designed to function without release of compressed air into the atmosphere. Any size system is eligible – there is no restriction on compressor size.	\$125 each
Outside Air Intake	Compressor intake drawing air from compressor room	≤ 75 hp compressor where permanent ductwork between compressor air intake and outdoors	Ductwork must meet manufacturer's specifications, which may include: (a) ≤ 0.25" W.C. pressure loss at rated flow, and (b) allow use of compressor room air during extremely cold outside air conditions	\$7.50/hp

Notes for compressed air incentives

- 1. Equipment that meets or exceeds the efficiency requirements above may qualify for the listed incentive.
- 2. Except for the zero loss condensate drain measure, eligibility for incentives is limited to compressed air systems with total compressor capacity of 75 hp or less, not including backup compressor capacity that does not normally run.
- 3. Incentives are capped at 70% of energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy savings and energy efficiency project costs are subject to Pacific Power approval.
- 4. Zero loss condensate drains purchased as an integral part of another measure are eligible for the incentive shown above.

hp = horsepower

PPM = Parts per Million

PSI = Pounds per square incl

scfm = cubic feet of air per minute at standard conditions (14.5 psia, 68°F and 0% relative humidity)

VFD = Variable Frequency Drive

INCENTIVES FOR WASTEWATER AND OTHER REFRIGERATION					
EQUIPMENT TYPE	REPLACE	WITH	CUSTOMER INCENTIVE		
Adaptive Refrigeration Control	Conventional controls (defrost timeclock, space thermostat, evaporator fan control, if any, thermal expansion valve in some instances)	Adaptive refrigeration controller and, in some instances, electric expansion valve	\$0.28/kWh annual savings		
Fast Acting Door	Manually operated door, automatic door with long cycle time, strip curtain, or entryway with no door in refrigerated/conditioned space	Fast acting door	\$0.28/kWh annual savings		
Wastewater – Low Power Mixer	Excess aeration capacity	Extended range circulator	\$0.28/kWh annual savings		

- Notes for wastewater and other refrigeration incentives:

 1. Equipment that meets or exceeds the efficiency requirements above may qualify for the listed incentive.
- 2. Incentives are capped at 70% in energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy savings and energy efficiency project costs are subject to Pacific Power approval.
