Notes for lighting retrofit incentives:

- To be eligible for the incentives listed, the new lighting system must use less energy than the existing lighting system replaced or the baseline lighting system as determined by Pacific Power. To be eligible for an incentive for a system with controls, the new controls must save energy relative to existing controls.
- Incentives are capped at 70 percent of energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy efficiency project costs are subject to Pacific Power approval.
- Incentives listed as \$/kWh are paid per kWh annual energy savings as determined by Pacific Power.
- Eligible retrofit lighting equipment is defined in qualified equipment lists posted in the [Washington lighting catalog](#).
- A complete list of lighting equipment not eligible for retrofit incentives is available in the [Washington lighting catalog](#).
